  }
}
}

```

Resulting Code : **Login.cy.js**

```

describe("LogIn", () => {
  it("tests LogIn", () => {
    cy.viewport(1208, 869);
    cy.visit("http://localhost:3000/");
    cy.get("input[type='email']").click();
    cy.get("input[type='email']").type("example12@example12.com");
    cy.get("input[type='password']").type("example12");
    cy.get("button:nth-of-type(1)").click();
  });
});
//# recorderSourceMap=BCBDBEBFBGAGAGBHB

```

Snapshot of E2E Testing:

The screenshot displays the Cypress test runner interface. The top section shows a browser window at `localhost:3000/_/#/specs/runner?file=cypress/e2e/Login.cy.js`. The browser content shows a web application with a header containing "PokéMania", "Favourites", "Game", "TalkTalk", "example12", and "Logout". A search bar is present with the text "Search Pokémon by name or ID...". The main content area displays "CI/CD Test: This is a test paragraph to verify the CI/CD pipeline." and a footer with copyright information.

The bottom section shows the Cypress test runner interface. The left sidebar lists the project structure, including `BBPROJECT`, `client`, `cypress`, and `support`. The `JS Login.cy.js` file is selected. The right pane shows the test results for the `describe("Login", () => {` test suite. The test `it("tests Login")` passed successfully, with a duration of 1480ms. The terminal output shows the command `npx cypress run --spec "cypress/e2e/Login.cy.js"` and the resulting test results.

```
POST /domainreliability/upload - - ms - -
PS C:\Users\rkafka\COMP229\BBProject> npx cypress run --spec "cypress/e2e/Login.cy.js"
